

TIAS WEBINAR:

“Dialogue on knowledge co-production”

MONDAY, 6 JUNE 2016

Hosted by

The Integrated Assessment Society

(<http://www.tias-web.info>)

Organised and led by:

Marcela Brugnach, University of Twente,
Silke Beck, Helmholtz Centre for Environmental Research,
Susanne Moser, Susanne Moser Research & Consulting,
and Stanford’s Woods Institute for the Environment

Agenda

Time	Activity
15 mins	Introduction to the Webinar –topic & objectives Introduction round - participants & presenters
60 mins	Dialogue on the topic (Questions and Answers): Part 1 Introduction to Future Earth Part 2 Definitions and state of the art & examples from Future Earth Part 3 Shortcomings, opportunities and ways forward
15 mins	Closing round Follow up and next steps

Part 1 Introduction to Future Earth

- Presentations by Susanne Moser and Silke Beck

Part 2: Definitions and state of the art with examples from Future Earth

1. What does knowledge co-production refer to? and how is co-production of knowledge defined?
2. How do we best foster links between knowledge and action?
3. In a co-production process, what is knowledge? How is knowledge validated?
4. How do we know if co-production is or isn't working? Are there examples?
5. How are issues of power and power differentials taken into account?
6. Who participates in co-production processes? How are the goals set? Whose goals are these?

Definitions

1. What does knowledge co-production refer to? and How co-production of knowledge is defined?

“the collaborative process of bringing a plurality of knowledge sources and types together to address a defined problem and build an integrated or systems-oriented understanding of that problem.”
(Armitage et al. 2011)—

The co-production of knowledge is promoted as a more inclusive way of generating relevant, robust and actionable knowledge.

- **Part 3** Shortcomings, opportunities and ways forward

- Closing round
- Follow up and next steps
